DETAILED ACTION

 Receipt is acknowledged of applicants' RCE, amendment, remarks, and terminal disclaimers, all filed on 25 October 2007.

• The obviousness-type double patenting rejections are withdrawn in view of the terminal disclaimers.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicants' submission filed on 25 October 2007 has been entered.

Terminal Disclaimer

The terminal disclaimers filed on 25 October 2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent Nos. 6,355,265; 6,541,048; 6,426,090; 6,322,806; 6,290,985; 6,627,234; 6,465,003; 7,163,705; 6,773,716; 6,645,535; 6,558,692; and 6,355,265 as well as any patent granted on U.S. Application Nos. 09/990,628; 10/206492; 11/269,980; 11/273,941; and 11/273,942 have been reviewed and are accepted. The terminal disclaimers have been recorded.

Art Unit: 1618

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8-20 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

As amended, the instant claim set recites the limitation "wherein the consumable tableted center is not a chewing gum". After carefully examining the instant disclosure, the examiner respectfully submits that support for this amendment is lacking and the addition of said limitation is new matter. The specification, including page 10, lines 10-19 has been carefully reviewed and sufficient support for the limitation "wherein the consumable tableted center is not a chewing gum" was not found.

Importantly, the amendment <u>absolutely</u> excludes chewing gum from the claimed invention. There is no suggestion in the instant disclosure, either implicit or explicit, that chewing gum is to be excluded from the disclosure. To the contrary, the instant specification repeatedly discloses chewing gum as an embodiment of the application:

 instant claims 14 and 18 recite a consumable center comprising gummy confectionaries;

Art Unit: 1618

the consumable center may comprise a gummi candy (see page 5, line 16);

drug delivery is provided by, "...chewing the product to cause the medicament
to be released from the product into the buccal cavity of the chewer; and
continuing to chew the product thereby creating a fluid pressure causing the
medicament to enter the systemic system of the chewer through the oral

 an advantage recited by the instant application is, "...to provide a chewable product that contains an agent that heretofore could not be provided in a chewable form that was palatable." see page 8, lines 11-13; and

mucosa contained in the buccal cavity." see page 6, lines 22-26;

example 1 (see instant specification, pages 22-25) and example 2 (see instant specification, pages 22-25) which are explicit examples of a consumable center comprised of chewing gum.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 8-20 remain rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,541,048 to Zyck et al. ("Zyck").

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another." or by an appropriate showing under 37 CFR 1.131.

Zyck teaches a product comprising a medicament comprising:

- the consumable tableted center of instant claims 8 and 16 (see col. 10, line
 3);
- the coating comprising a medicament of instant claims 8 and 16 (see col. 2, lines 18-23);
- the at least 50% coating by weight of instant claims 8 and 16 (see col. 10, line 29);
- the antacids of instant claims 9 and 17 (see col. 2, lines 18-23);
- the taste masking agent of instant claims 10, 12, and 19 (see col. 8, line 55);
- the xylitol of instant claim 11 (see col. 8, line 55);
- the aspartame of instant claims 13 and 20 (see col. 7, line 49); and
- the gummi confectionaries of instant claims 14 and 18 (see col. 1, line 65 –
 col. 2, lines 25-27).

Zyck does not disclose a shellac layer.

2. Claims 8-14 and 16-20 remain rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,627,234 to Johnson, et al. ("Johnson").

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Johnson teaches a product comprising a medicament comprising:

- the consumable tableted center of instant claims 8 and 16 (see col. 10, line
 57);
- the coating comprising a medicament of instant claims 8 and 16 (see col. 2, lines 59-66);
- the at least 50% coating by weight of instant claims 8 and 16 (see col. 15, line 41);
- the analgesics of instant claims 9 and 17 (see col. 5, line 65);
- the taste masking agent of instant claims 10, 12, and 19 (see col. 12, line 38);
- the xylitol of instant claim 11 (see col. 12, line 38);
- the aspartame of instant claims 13 and 20 (see col. 9, line 27); and
- the gummi confectionaries of instant claims 14 and 18 (see col. 2, lines 59-66).

Art Unit: 1618

3. Claims 8-14 and 16-20 remain rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 7,163,705 to Johnson, et al. ("Johnson").

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Johnson teaches a product comprising a medicament comprising:

- the consumable tableted center of instant claims 8 and 16 (see col. 13, line
 51);
- the coating comprising a medicament of instant claims 8 and 16 (see col. 3, lines 16-19);
- the at least 50% coating by weight of instant claims 8 and 16 (see col. 12, line 1);
- the muscle relaxants of instant claims 9 and 17 (see col. 5, line 9);
- the taste masking agent of instant claims 10, 12, and 19 (see col. 13, line 66);
- the xylitol of instant claim 11 (see col. 13, line 66);
- the aspartame of instant claims 13 and 20 (see col. 13, line 17); and
- the gummi confectionaries of instant claims 14 and 18 (see col. 3, lines 16-19).

4. Claims 8-20 remain rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,645,535 to Zyck et al. ("Zyck").

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Zyck teaches a product comprising a medicament comprising:

- the consumable tableted center of instant claims 8 and 16 (see col. 10, line
 37);
- the coating comprising a medicament of instant claims 8 and 16 (see col. 2, lines 33-44);
- the at least 50% coating by weight of instant claims 8 and 16 (see col. 9, line
 9);
- the antacids of instant claims 9 and 17 (see col. 2, lines 33-44);
- the taste masking agent of instant claims 10, 12, and 19 (see col. 9, line 17);
- the xylitol of instant claim 11 (see col. 9, line 17);
- the aspartame of instant claims 13 and 20 (see col. 8, line 13); and
- the gummi confectionaries of instant claims 14 and 18 (see col. 2, lines 33-44).

Zyck does not disclose a shellac layer.

Art Unit: 1618

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 8-20 remain rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 7,056,541 to Stahl ("Stahl").

Stahl teaches a product comprising a medicament comprising:

- the consumable tableted center of instant claims 8 and 16 (see col. 1, line 38);
- the coating comprising a medicament of instant claims 8 and 16 (see col. 2, lines 37-49);
- the vitamins of instant claims 9 and 17 (see col. 5, line 17);
- the taste masking agent of instant claims 10, 12, and 19 (see col. 7, line 21);
- the xylitol of instant claim 11 (see col. 7, line 21);
- the aspartame of instant claims 13 and 20 (see col. 5, line 10); and
- the gummi confectionaries of instant claims 14 and 18 (see col. 1, line 65 col. 2, line 2).

It would have been obvious to on having ordinary skill in the art at the time the invention was made to omit the shellac layer of instant claim 15, since it has been held that omission of an element and its function in a combination where the remaining

Art Unit: 1618

elements perform the same functions as before involves only routine skill in the art. *In re Karlson*, 136 USPQ 184.

Stahl explains that adding a medicament to the coating is beneficial because, "...active substance(s) is/are exposed to the consumer within a short period of chewing." See col. 2, lines 52-53.

While Stahl does not explicitly teach the percentages of instant claims 8, 12, 13, 16, and 20, it would have been obvious to one of ordinary skill in the art at the time the invention was made to determine suitable percentages through routine or manipulative experimentation to obtain the best possible results, as these are variable parameters attainable within the art.

Moreover, generally, differences in concentration will not support the patentability of subject matter encompassed by the prior art unless there is evidence indicating such concentration is critical. "[W]here the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation." *In re Aller*, 220 F.2d 454, 456; 105 USPQ 233, 235 (CCPA 1955). Applicants have not demonstrated any unexpected or unusual results, which accrue from the instant percentage ranges.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to disclose a product comprising a consumable tableted center and a coating comprising a medicament, as taught by Stahl. One of ordinary skill in the art at the time the invention was made would have been motivated to make such a product because it quick exposure of medicament to the consumer, as explained by Stahl.

Art Unit: 1618

Response to Arguments

Applicants' arguments filed on 25 October 2007 have been fully considered but

they are not persuasive.

Applicants argue that the instant application is distinguished from the cited prior

art by the newly added amendment, "wherein the consumable tableted center is not a

chewing gum". See remarks, filed 25 October 2007.

The newly added amendment is deemed to be new matter and, as such is not

given any patentable weight (see 35 USC 112, 1st paragraph rejection, above).
